

SINEXOX

**MEETING THE WORLD'S
COMMODITY NEEDS
WITH TRUST, SPEED,
AND GLOBAL PRECISION**

In an interconnected world driven by trade, supply chains, and resource competition, commodities are the heartbeat of global development. From the food that feeds nations to the fuel that powers industries, the ability to source and move essential commodities—quickly, reliably, and ethically—is a cornerstone of economic resilience.

This is where Sinewox comes in. As a next-generation international commodities broker, Sinewox delivers more than just product—it delivers peace of mind.

A WORLD IN DEMAND: WHY RELIABLE COMMODITY TRADE MATTERS

Every day, the global market moves trillions of dollars' worth of agricultural products, energy sources, metals, and raw materials. Yet even with digital platforms and trade agreements in place, buyers still struggle with:

- Unverified suppliers and fake listings
- Long negotiation cycles and paperwork bottlenecks
- Poor communication and lack of visibility
- Delays in shipping, customs clearance, and payments
- Risk of fraud or contract default

Sinewox was founded to eliminate these barriers. With our experienced global team, verified partnerships, and end-to-end support structure, we enable seamless and secure commodity trading between vetted buyers and trusted producers—anywhere in the world.

TRUST IS OUR CURRENCY

The #1 reason global commodity deals fall apart? Lack of trust. Whether it's a missed shipment, a questionable quality certificate, or an unreliable payment structure, international trade demands strong due diligence.

At Sinewox, trust is non-negotiable. That's why we apply:

- Rigorous supplier verification before any offer is presented
- Transparent contracts with clearly outlined specs, pricing, and terms
- Documented performance history with buyer and seller references
- Legal compliance across jurisdictions with support for LC, MT103/TT, and escrow systems
- Hands-on coordination from inquiry to delivery

Every transaction is monitored by a senior broker, with clear channels of communication and built-in contingency planning. ****We don't just connect—**we protect.**

SPEED MATTERS: FROM DEAL TO DELIVERY, WITHOUT DELAY

When it comes to commodity trading, time kills deals. Delays in documentation, shipping, customs, or communication often result in massive financial losses and broken trust.

That's why Sinewox prioritizes speed and execution:

- Rapid match-making between demand and supply
- Fast LOI and ICPO processing
- Real-time freight and port coordination
- End-to-end visibility of shipping status
- Live updates and document management

Whether you need 100,000 metric tons of corn, a bulk order of diesel fuel, or shiploads of LNG, we mobilize quickly and execute precisely—so you can focus on growth, not paperwork.

COMMODITIES WE SPECIALIZE IN

Sinewox offers brokerage services for a broad range of agricultural, energy, and industrial commodities, including but not limited to:

AGRICULTURAL COMMODITIES

- Corn (Feed, Yellow, White)
- Soybeans
- Wheat
- Rice
- Sugar
- Coffee & Cacao
- Cotton

ENERGY & FUEL PRODUCTS

- LNG (Liquefied Natural Gas)
- LPG (Liquefied Petroleum Gas)
- Ethanol & Biofuels
- Diesel (Low-grade & ULSD)
- Crude Oil
- Jet A1

METALS & MINERALS

- Copper, Brass & Bronze
- Gold & Silver (Bullion & Scrap)
- Rare Earth Elements
- Lithium
- Iron Ore & Manganese

Each transaction is tailored to the specific requirements of the buyer—whether it's CIF to Asia, FOB from the Middle East, or DAP to Africa.

A PARTNER YOU CAN COUNT ON

What sets Sinewox apart is our commitment to relationship-based brokerage. We're not here to churn out mass deals or offer generic listings. We work with serious buyers and verified sellers to build mutually beneficial partnerships.

Our clients include:

- Government procurement offices
- Trading houses and investment firms
- Energy companies and distributors
- Agricultural cooperatives and food processors
- Industrial manufacturers and logistics providers

With boots on the ground in key sourcing regions and strategic relationships with freight and legal partners, we offer a one-stop shop for reliable, scalable trade solutions.

SUPPORTING GLOBAL RESILIENCE AND GROWTH

In a world facing climate disruption, supply chain instability, and geopolitical risk, resilient trade is more vital than ever. Sinewox is investing in:

- Sustainable sourcing with local producers and renewable fuel options
- Digital trade tools to simplify contracts, compliance, and communications
- Carbon-conscious freight coordination to minimize impact
- Strategic stockpiling for food and fuel security in vulnerable regions

We believe commodity trading should be ethical, efficient, and future-ready—and we're doing our part to get there.
